PROFESSIONAL SUMMARY

Full-stack MERN Developer specializing in scalable web applications and real-time systems. Experienced in building secure backend architectures, optimizing performance (up to 35% improvement), and developing high-concurrency applications using Node.js, WebSockets, and modern system design principles.

EDUCATION

Computer Science and Engineering NIST University	2023-2027 Berhampur
Intermediate(ICSE) Xavier School	2020-2022 Gamharia

RELEVANT EXPERIENCE

Full-Stack Developer (PERN)	2023 – Present
• Built and deployed scalable PERN applications with real-time features • Designed backend systems using MVC architecture and REST APIs • Implemented secure authentication (JWT,role-based access control) • Optimized application performance by up to 35%	

PROJECTS

Real-Time Interview Platform React, Node.js, Express.js, MongoDB, Clerk, Inngest	Present
• Built a real-time interview platform with 1-on-1 video calls and integrated chat • Implemented secure authentication and protected sessions • Developed scalable backend APIs for managing real-time events • Improved scalability and reduced API response time by 25%	
Professional Training Platform React, Node.js, Express.js, PostgreSQL, Prisma, Socket.IO	Present
• Built a training marketplace connecting trainers, institutions, and students • Implemented JWT authentication with role-based access control • Designed scalable backend using MVC architecture and PostgreSQL • Integrated real-time messaging and notifications	
Real-Time Chat Application React, Node.js, Express.js, MongoDB, JWT, Socket.IO	2025
• Developed real-time messaging system supporting 100+ concurrent users • Implemented secure private and public chat rooms • Reduced latency by 35% and improved response time by 20% • Designed modular backend APIs for scalability	

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL
Frontend: React.js, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, PostgreSQL
Tools & Others: Git, GitHub, Postman, Vite, Docker
